PLANT LEADERSHIP ASIA

# Looking to improve your process simulator training?

*You are invited to attend  
this **FREE** Workshop!*

## *Implementing Effective Process Simulator Training*

Get the most out of your simulator based training and  
learn how to...

- Integrate **Operator Training Simulators** and **NEW Virtual Field Operator** technology into your existing training program
- Build effective **simulator training scenarios** that capture the interest of trainees while supporting your curriculum
- **Assess and overcome barriers** to establishing and maintaining a simulator-based training program

**Aren't using the latest technologies?  
Attend this Workshop and see...**

- **Virtual Reality** applications that work seamlessly with OTS
- **Mobile learning** applications that your **Gen Z** employees and students **LOVE!**
- The latest in **Micro-Learning** for process equipment

### About the Workshop

Operator Training Simulators (OTS) are recognized as powerful tools for industry and educational institutions to teach process industry skills. New and experienced users of simulators continually look for ways to **improve return on simulator investments** by finding more and improved ways to use them.

You can find out **HOW** when you attend this **Workshop** sponsored by **Simtronics** - the process simulator leader since 1992! You will learn from the experts - for **FREE!**
